LANGUAGE

- English
- Japanese (basic)

SKILLS

Front-End Development:

- Nuxt.js
- TypeScript
- JavaScript
- HTML
- CSS (Tailwind, etc)
- React Native

EXPERIENCE

Full Stack Developer (Part-Time) Exodo, Germany - 2025 to Present

Developed a web application using Next.js and Supabase storage, collaborating with a freelance expat in Germany to deliver a robust solution, implementing both UI and backend components for a seamless full-stack experience.

Front End Web Developer (Part-Time) Narnoo Inc, Brisbane, Australia - 2024 to Present

Created a full-featured eCommerce platform for booking leisure activities and accommodations, leading both front-end and back-end development with Nuxt.js and TypeScript to deliver a seamless user experience and a reliable booking system.

Software Developer (Part-Time) Rikai Inc, Australia - 2024 to Present

Built a secure, audit-focused web application for financial institutions with Node.js and TypeScript, incorporating compliance features and robust data validation to enable efficient and accurate audits for banking professionals.

React Developer (Freelance, Part-Time) Australia, 2024

Worked on a new mobile application using React Native and Tailwind CSS to deliver a modern, responsive design and seamless user experience.

Back-End Development:

- Nuxt.js
- TypeScript
- Node.js
- Express.js

Database Management:

- MySQL
- SQLite
- MSSQL

Version Control:

- Git
- GitHub
- GitLab

Testing & Debugging:

- Postman
- Mocha & Chai
- SonarQube

Project Management:

- Redmine
- Asana

Operating Systems:

- Windows
- MacOS

**Associate Research and Development Engineer
(Full-Time)**
**Advanced World Solutions Inc., Makati, Philippines -
2022 to 2024**

Migrated a property management desktop application from C# .NET and Java to React TypeScript and Express TypeScript, developing and maintaining core frameworks and utilities across 500+ screens and 800+ APIs. Responsibilities included analyzing modules, resolving bugs, implementing requirements from Japanese design documents, performing automated unit testing, and conducting code reviews. Collaborated as a full-stack developer with the internal team in the Philippines.
